

Procinct Security Corporate Overview

Established in 2002, Procinct Security Corporation is privately held and headquartered in San Francisco, California. We automate paying attention.SM Procinct Security Corporation's mission is to develop cutting edge information security software solutions that help clients across all industries secure their Internet infrastructure.

Procinct Security was founded by a core team of security experts that has been providing clients an independent and trustworthy third party perspective on information security issues since 1995. Built on a strong engineering tradition, Procinct Security's engineers are experienced not only with information security – both legacy and leading edge technologies – but also with businesses in government, finance and technology sectors. The collective Internet security and software development experience of the current employees exceeds 150 years.

This security expertise and business experience working directly with customers led to the development of ProSentry 2.0. A hosted service, ProSentry 2.0 is packaged to deliver an automated, non-intrusive, flexible, and easy to use, subscription based Internet security monitoring and management solution. Procinct Security also provides a wide range of security consulting services.

Procinct Security, provider of the ProSentry™ Internet Security Monitoring service, is comprised of senior software architects and trustworthy security professionals who hold sensitive security clearances and CISSP and SANS GIAC security certifications.

Procinct Security is a charter member of the Center for Internet Security and an independent member of the BDO Seidman Alliance.
